EXPERIENCE & RESPONSIBILITIES

Alicia Glick is an Environmental Technician in Atlas' East Hartford, Connecticut office. Ms. Glick has experience in Phase I Environmental Site Assessments for commercial properties, including site reconnaissance and regulatory agency and local file reviews. Ms. Glick performs field sampling activities associated with groundwater monitoring programs, soil sampling collection, and remedial excavations.

RELEVANT PROJECT EXPERIENCE

Environmental Services, Phase I ESAs:

Conducted several site investigations relating to Phase I assessments. This process can include site reconnaissance, historical research at local municipalities and state agencies, and completion of reporting in compliance with ASTM standards.

Environmental Services, Phase II ESAs:

Activities including oversight of environmental drilling, soil characterization, monitoring well installation, soil and groundwater sampling, and technical report writing.

Remedial Planning and Implementation:

Project manager for improvement of a 1.1-mile segment of Bass Road that involved widening the existing 2 lanes to 4 lanes and replacing the bridges over I-75 and Beaverdam Creek. The corridor consisted of four 11-foot travel lanes, 20-foot raised median, and urban shoulders with sidewalks. Challenges included FHWA coordination, intersection control evaluation, stream buffer encroachments, and public involvement. As project manager, Mr. Hanson managed the design, scope, schedule, and budget of this project. In addition, he was responsible with coordinating the design of the project with all federal, state, and local agencies. Mr. Hanson has the experience to keep the project on track by coordinating with subcontractors and subject matter experts and identifying high-risk obstacles early on in concept development. (PI 0017121)

Environmental Compliance Assistance:

Involved with projects for multiple municipalities across Connecticut including landfill, stormwater, and wastewater monitoring and permit preparation and compliance. Includes development of proposals, field sampling, catchment investigation, and reporting.
