Capitol Region Purchasing Council
Invitation to Bid #756
Municipal Stormwater Monitoring Services

As required in Invitation for Bid #756, the unit price proposed of **$570** on form "Stormwater Monitoring Services (BT-04MY)" includes the analysis of the following requested parameters:

- pH
- Hardness
- Conductivity
- Oil and Grease
- Chemical Oxygen Demand
- Turbidity
- Total Suspended Solids
- Total Phosphorous
- Ammonia
- Total Kjeldahl Nitrogen
- Nitrate plus Nitrite Nitrogen
- E. coli

Below are the unit prices for locations that require laboratory analysis of phosphorus and nitrogen or bacteria only.

Unit Price: $365

Price includes outfall screening and data reporting for phosphorus and nitrogen. Additionally, travel and mileage costs are included. If screening for bacteria, turbidity, or other analytes is required at the location during the same sampling event, these will incur an additional fee to cover laboratory or field kit expenses. The fee schedule for additional analytes is as follows: bacteria (add $30), turbidity (add $20), other analytes (contact for pricing).

Unit Price: $340

Price includes outfall screening and data reporting for bacteria**.** Additionally, travel and mileage costs are included. If screening for nitrogen, turbidity, or other analytes is required at the location during the same sampling event, these will incur an additional fee to cover laboratory or field kit expenses. The fee schedule for additional analytes is as follows: Phosphorus (add $25), nitrogen (add $55), turbidity (add $20), other analytes (contact for pricing).
