The pH of the submitted liquid chemical products shall be 3.2 – 9.0. The pH limit of the liquid chemical products may be waived by CRPC members. CRPC members’ decisions to waive the pH requirement shall be in their best interests and shall be final.

The material shall contain a minimum of 13.0% MgCl₂ by weight.

The material shall contain sufficient OBPE to produce a final material having a eutectic (freezing) point of -20°F or lower.

Bidder shall provide a table showing the Freezing Point vs. Specific Gravity for varying dilutions of product in water, starting at 5% and continuing up to and including the percentage needed to reach the eutectic (freezing) point.

A 3% solution of the product shall have a corrosion value of at least 70% less than that of a 3% solution of sodium chloride (determined by NACE (National Association of Corrosion Engineers) Standard TM-01-69 as modified by PNS (Pacific Northwest Snowfighters).

This chemical product shall not contain greater than 4.0% (V/V) Total Settleable Solids after being stored at 0 degrees F for 168 hours. If any solids are observed, 99% of those solids must mass through a #10 sieve.

An independent certified analysis conducted within the last three years, showing compliance with all of the above requirements, must be submitted with the bid along with an intended use statement for the product. Exceptions to these requirements must be stated and CRPC members reserve the right to reject the product.

Mixing the Salt and Liquid Magnesium Chloride/Liquid Calcium Chloride/OBPE

The salt and magnesium chloride or salt and calcium chloride/OBPE shall be mixed as described in this section to produce the finished product.

CRPC members reserve the right to take samples from the contractor's stockpile or transfer point before the salt is mixed with the LMC/LCC/OBPE. Samples of both the salt and the LMC/OBPE may be taken.

The contractor will thoroughly mix a minimum of 8 gallons of LMC/LCC/OBPE per ton of salt. The contractor shall ensure a consistent thorough mix (e.g. spray system, pug mill, conveyor) so there is maximum coverage of the liquid on the salt crystals (loader mixing and stockpile injection methods are not acceptable) and will specify the mix method on the bid.

Trucks must be weighed on a certified scale with printout after loading the final product and prior to delivery. The weight ticket shall contain the net weight of the final product and the stockpile source. The certification must bear the weighmaster's signature. Handwritten weights are not acceptable. All shipments of the product shall be accompanied by a ticket indicating the amount of LMC/LCC/OBPE mixed in with the finished product. This amount will be indicated on the tickets in gallons and may be machine printed or handwritten.

Final Product: Road Salt treated with Liquid Magnesium Chloride/Liquid Calcium Chloride/OBPE

The delivered product shall be uniform in appearance, free flowing and free from visual evidence of foreign matter including but not limited to dirt, stone, trash or any other material that could be reasonably expected to interfere with the use, handling or storage of the material.

The properly stored product (covered or inside storage) shall be uniform and free flowing in a manner consistent with its intended use and shall show no objectionable clumping or caking. The product shall show no indication of objectionable leaching or separation of components to the extent that such condition produces adverse effects in the handling or usage of the product or routine maintenance of the storage facility.

The finished product shall not be less than 91.2% sodium chloride determined as follows: Apparent total % sodium chloride shall be determined in accordance with ASTM-D-632. Magnesium and calcium content shall be determined in accordance with ASTM E-534 and computed as % magnesium chloride and % calcium chloride respectively. % sodium chloride shall then be computed as follows:

$$\% \text{ sodium chloride} = \% \text{ apparent sodium chloride} - (\% \text{ magnesium chloride} + \% \text{ calcium chloride})$$

Moisture content shall not exceed 4.8% when determined as follows and in accordance with procedures of the AWWA B200-88, Section 4.3:

$$\% \text{ moisture} = (W_1 - W_2) / (W_1 \times 100) \quad \text{where:}$$

W_1 = initial weight of sample

W_2 = weight of sample after drying to a constant weight at 110°C +/- 5°C

Sampling shall be done in accordance with current ASTM D-632. The treated salt may be rejected if it fails to conform to any of the requirements of this specification.

If the moisture content of the treated salt is found to be above 5.3%, a deduction for moisture content will be made from the delivered bid price based on the following formula:

Reduced price per ton = delivered contract price/ton X (1.106 – 2x)

where: x = moisture content of sample (expressed as the decimal equivalent of the percentage of the original sample weight to the nearest 1%)

A non-complying product price deduction will not be assessed unless the proper analysis and test procedures are followed. If the contractor consistently delivers salt found to be above 2% moisture content, the contract shall be subject to cancellation either in whole or in part.

Calculations performed relative to this specification shall be made using the rounding off method of “ASTM Recommended Practice E-29 for Designating Significant Places in Specified Limiting Values”.

MATERIAL SAFETY DATA SHEETS:

Awarded vendors will be required to provide CPRC staff and participating members appropriate Material Safety Data Sheets within 20 days after award or upon first delivery, whichever occurs first.

PRODUCT EFFICACY:

Respondents are asked to supply literature and any available test results with their bid to demonstrate the offered product’s ability to reduce corrosiveness, improve low temperature performance, reduce bounce and scatter, prevent clumping and enhance flowability when mixed with road salt. In addition, if the product bid is a new formulation for this year, respondents are asked to: note this fact as part of their response, highlight the changes made to the new version, and identify how the new product compares to the previous version.

ROAD SALT SUPPLY GUARANTEE:

Bidders must provide written certification from their road salt producer/supplier guaranteeing that the bidder has access to a sufficient amount of road salt product to supply the needs of the participants for the entire term of the contract. Bidders are expected to provide up to 150% of a Council member’s initial estimated annual quantity. This information must be provided as part of the bid submission.

NON-STAINING GUARANTEE:

Bidders must provide documentation as part of their bid response demonstrating that their product will not stain local property if it contains a dye.

ENVIRONMENTAL CONSIDERATIONS:

Bidder must provide documentation as part of their bid response demonstrating that their product is ecologically safe and is in compliance with applicable CT Department of Environmental Protection and US Environmental Protection Agency regulations.

DELIVERY:

Scheduling of deliveries is of the utmost importance. The vendor must strictly adhere to delivery schedules set between it and CRPC members.

Trucks delivering the product shall have the entire cargo area completely covered by a waterproof tarpaulin or similar sheeting material to protect the material, prevent spillage and meet all environmental regulations.

Torn or ripped covers may be a cause for rejection of the shipment.

Delivery will commence within 48 hours after confirmation of order by an authorized CPRC member representative, Monday through Friday between the hours of 7:30 a.m. and 3:30 p.m. **An order that is not completed within 5 days after commencement of delivery, or completed within the schedule set between an authorized CPRC member representative and the vendor, shall be deemed incomplete and may begin accruing penalties described below.**

During periods of repeated storm activity, or when the supply is considered critical by the participating entity, deliveries occurring outside of the normal business hours may be required.

If delivery is not made in the timeframe specified, a deduction from the price shall be made based on the actual costs incurred as a result of the late/non-delivery. Cost incurred shall include, but are not limited to the following:

- Increased personnel costs due to demurrage.
- Increased costs incurred for treatment of salt on hand to extend usage.
- Costs for clean-up after required application of a “treated” salt product (i.e. salt mixed with sand).

Members may enforce penalties by withholding payment or a portion of payment until the delivery is completed.

All deliveries shall comply in every aspect with all applicable Federal and State laws.

SPILLAGE

Any spillage at the time of delivery will be the responsibility of the vendor and any costs to repair resultant damages or any penalties assessed against a Council member because of pollution resulting from such spillage shall be borne by the vendor.

Question and Answers for Bid #644 - Treated Road Salt

Overall Bid Questions

Question 1

â€¢ In Region 2 (In Season) has an additional 6000 tons listed for â€œTown of Manchester Information Systemsâ€ . Is that another governmental entity in Manchester, or something else?

â€¢ Likewise, in Region 5 (In Season) â€œTown of Glastonburyâ€ @ 2155 Main Street is listed for additional 6000 tons. Is this in addition to their 6000 listed with the other towns or a redundancy? (Submitted: Jun 2, 2016 2:35:43 PM EDT)

Answer

- The quantities listed for Manchester and Glastonbury are not in addition to the quantities listed in the aggregated quantities for their region. It is a redundant amount, but cannot be removed from the bid. Please use the aggregated quantities when submitting your bids. (Answered: Jun 2, 2016 2:37:26 PM EDT)

Question 2

In reviewing the â€œInvitation to Bidâ€ for Bid #644 I noticed on page 18 under â€œExperienceâ€ - a reference to â€œthe attached Information Sheetâ€ .

However, unless I am missing something, I do not see an Information Sheet (similar to the one found on pages 20-23 of last yearâ€™s Bid #625) as part of the 24 pages that allows bidders to fill in a sheet with information regarding â€œsupply detailsâ€ , experience, ordering, and contingency plansâ€ , as was part of Bid #625.

Could you provide some guidance on this issue? (Submitted: Jun 14, 2016 8:18:46 AM EDT)

Answer

- The Information Sheet was inadvertently left off the documents list. It has now been added. Vendors shall fill the Information Sheet out and it will be included as part of your bid submission. (Answered: Jun 14, 2016 8:21:07 AM EDT)
