Sotoria Montanari, LOTCIP Program Manager

Subject: Potential 2017 LOTCIP Solicitation - Bridges

In 2015, CRCOG held a solicitation for approximately two years' worth of Local Transportation Capital Improvement Program (LOTCIP) funded projects. It is approaching two years since that solicitation, and therefore a discussion is warranted regarding the timeframe, size, and focus of the next solicitation. We have also heard from a few towns as it relates to limited resources for bridge rehabilitation / reconstruction projects and would like to discuss this and the potential for a bridge solicitation under LOTCIP. Summarized below are LOTCIP financials and the condition of LOTCIP eligible municipal bridges in the region.

LOTCIP Financials

As part of the State's 2018-2019 budgeting process, CTDOT submitted its budget request which included additional funding for LOTCIP. The requested LOTCIP amount would result in an approximate \$17.4 million allocated to CRCOG for each of these years. CRCOG has reviewed the current LOTCIP financials and the below summarizes the amounts of potential over/under-programing given various funding scenarios:

Funding Scenario
Bonded funds to date
Budgeted funds to date (through FY2017)
With anticipated Budgeted funds (CTDOT requested FY2018-2019)

(Over) / Under-Programming
(\$ 18.2 million)

\$ 2.5 million
\$ 37.2 million

The Governor is expected to release his FY2018-2019 budget on February 8th, with finalization by the General Assembly expected by the end of June. If a solicitation were started now, it likely will not be completed for months, and therefore the region could be under-programmed soon if additional LOTCIP funds are budgeted and approved.

Capitol Region Bridges

There are 771 municipal bridges within the Capitol Region, 329 (or approximately 43%) of which are eligible for LOTCIP funding. Of these LOTCIP eligible bridges, approximately 63 have CTDOT sufficiency ratings¹ of less than 60% (see Table 1) and an additional 130 have sufficiency ratings between 60% and 80% (see Table 2). A sufficiency rating of less than 60% indicates that reconstruction or replacement is likely required, and between 60% than 80% generally indicates the need for some form of rehabilitation. Additionally, at least 25 eligible

¹ Sufficiency Rating is a numerical rating of a bridge based on its structural adequacy and safety, essentiality for public use, and its serviceability and functional obsolescence. Sufficiency Rating is an overall rating of a bridge's fitness for the duty that it performs based on more than 20 data fields. A low Sufficiency Rating may be due to structural defects, narrow lanes, low vertical clearance, or many other possible issues.

Andover / Avon / Berlin / Bloomfield / Bolton / Canton / Columbia / Coventry / East Granby / East Hartford / East Windsor / Ellington / Enfield / Farmington Glastonbury / Granby / Hartford / Hebron / Manchester / Marlborough / Mansfield / New Britain / Newington / Plainville / Rocky Hill / Simsbury / Somers South Windsor / Southington / Stafford / Suffield / Tolland / Vernon / West Hartford / Wethersfield / Willington / Windsor / Windsor Locks

bridges not been inspected in over 10 years (see Table 3), and thus their current condition is largely unknown.

Two of the main funding sources for municipal bridges have historically included the State Local Bridge Program and the Federal Local Bridge Program. As shown in Tables 1, 2, and 3 some of the LOTCIP eligible bridges are also eligible for funding under these sources. However, as shown in Table 4 below, municipal funding responsibilities vary program to program, and the federal program is subject to sometimes burdensome federal processes.

Table 4: Bridge Program Funding Sources

Program	Funding Source
LOTCIP	Design Phase: 100% Municipal; Other Phases 100% State
Federal Local Bridge Program	All Phases: 80% Federal, 20% Municipal
State Local Bridge Program	All Phases: 50% State, 50% Municipal

Discussion

Recognizing both the need for a timely solicitation and the uncertainty of the budget process, staff feels that it would be prudent to proceed immediately with a smaller "stopgap" Phase 1 solicitation, followed by a reassessment at a later point in time on the need, size, and timing of a Phase 2 solicitation.

Within the region there is a need for municipal bridge improvements. However, project proposals of this nature have not historically fared well under CRCOG STP-Urban or LOTCIP selection criteria. CRCOG staff feels a bridge solicitation will help address needs and provide a more attractive funding alternative than what is currently provided.

Bridge rehabilitation and replacement costs can vary, but most anticipated eligible projects are expected to be within the \$500,000 to \$2,000,000 range. We would be interested in discussing the condition of bridges in the capitol region and consideration of a Phase 1 solicitation in the range of a single years' worth of LOTCIP funding (\$17 million range).
