IT Application Development Services

CRCOG General IT Services enable municipalities to have an independent perspective on IT and create customized solutions to meet their individual needs. CRCOG is proud to have partnered through a competitive bid process with Connecticut Center for Advanced Technology (CCAT) as our IT Strategic Partner, a 501(c)3 corporation to offer these services.

CCAT works with many towns in Connecticut already and is attuned to the unique challenges faced by municipal IT.

CCAT can develop custom applications and websites to meet your needs. At the outset of any project, CCAT analyzes client needs and chooses the best technologies to find a solution. Our design philosophy is to keep our custom-designed solutions modular, user-friendly, standards compliant, and scalable. CCAT's full-featured web and application development packages include custom, responsive, browser-compatible designs and effective layouts. Management is made simple with multiple device support in the case of mobile applications.

Available Services:

Applications designed to your specifications

- Progress is benchmarked by frequently collaborating with clients, gathering feedback, and adapting development accordingly.
- Applications are often designed in open source frameworks and royalty free.

Custom web design and development

- Boost an organization's brand with a well-designed, interactive, and informative web site.
- Web development includes custom, mobile-friendly designs and powerful content-management systems.

Uptime and security monitoring

- CCAT takes advantage of open source, community-developed technologies wherever possible.
- Tools range from fully developed, open-source content management platforms to our custom, in-house development framework.
- We frequently utilize the Linux/Apache/MySQL/PHP stack to support our development frameworks.
