

**CAPITOL REGION COUNCIL OF GOVERNMENTS  
REQUEST FOR QUALIFICATIONS  
FOR STRUCTURAL ENGINEERING SERVICES**

---

**ADDENDUM #1**

1. A sole practitioner is not likely to carry the level of professional liability insurance, special automobile insurance or worker's comp insurance. Are these levels required or can they be reduced?

Answer: After speaking to our insurance advisors, we can accept insurance limits that are lower, professional liability at \$2 million, and no worker's compensation or additional automobile insurance.

2. Why are we seeking the highest cost solutions? Simple, practical measures to insure the structural stability of the affected homes or structures is all that is required. .

Answer 2: We have heard from numerous experts with experience that the only foolproof solution is to remove the existing foundation and footings and replace it. However, if there are alternative methods that will maintain the structural integrity of the home, vendors are encouraged to submit them, and provide evidence and references for those methods.
