BID FORMS/SUBMISSION OF BIDS
The Council exclusively uses Bid Sync for the notification and dissemination of all solicitations. The receipt of solicitations through any other company may result in your receipt of incomplete specifications and/or addenda which could ultimately render your bid non-compliant. No oral, telegraphic or telephonic submittal will be accepted. IFB’s, RFP’s, RFQ’s and RFI’s shall be submitted in electronic format via BidSync. All Invitations For Bid (IFB), Requests For Proposals (RFP), Requests For Quotes (RFQ), Requests For Information (RFI) submitted electronically via BidSync shall remain locked until official date and time of opening as stated in the Special Terms and Conditions of the IFB, RFP, RFQ and/or RFI. A formal, in-person bid opening will not be held.

EXCEPTIONS TO SPECIFICATIONS
Vendors are directed to make sure that they understand the terms and conditions as specified in this Invitation for Bid. Unless exceptions to any of the terms and conditions, including pricing, are specified as part of the bid response, it will be expected that all terms and conditions expressed herein are acceptable and shall govern resulting contracts. The award process may also include additional considerations such as the information provided on the bid forms and the bidder’s perceived ability to fulfill his/her obligations as prescribed by these specifications. Each bidder must be prepared to show evidence of having satisfactorily carried out a similar contract, as inability to do so may be cause for rejection.
CONTRACT EXTENSION

II. TECHNICAL SPECIFICATIONS/ADDITIONAL REQUIREMENTS

1. General Description of Work
   The awarded contractor(s) shall be responsible for providing municipal stormwater monitoring services within the designated testing period of May 1st through October 31st in accordance with the requirements outlined in the MS4 General Permit. Broadly, said services shall include: sample testing, completing and submitting the applicable Stormwater Monitoring Report Forms to the municipality, and weather observation and tracking activities designed to identify qualifying storm events. Participating communities may either elect to have the awarded contractor collect the required samples, or to have the contractor furnish appropriate containers in which to collect and store the water samples for pickup by the laboratory. Finally, in an effort to assist the towns in evaluating the laboratory results received, the awarded contractor may also be requested to furnish general comments to explain if the measured levels are acceptable pursuant to State of Connecticut Water Quality Standards, or if additional monitoring/follow-up action is suggested.

   Contractors must meet or exceed all DEEP and EPA regulations.

   Note: Municipalities are required to submit an annual report, summarizing municipal stormwater management activities, to the Department of Environmental Protection by January 1st every year. Part of this annual report includes the stormwater monitoring results.

2. Monitoring Requirements
   In accordance with the MS4 General Permit, stormwater monitoring shall be conducted by the Regulated Small MS4 annually starting in 2004. Six (6) outfalls of the highest contributors of any of the pollutants of concern shall be sampled annually for the pollutant of concern in accordance with the CT DEEP Impaired Waters Discharge Schedule. If fewer than six outfalls so identified exist, all the outfalls shall be monitored.

   Each monitored outfall shall be selected based on an evaluation by the MS4 that the drainage area of such outfall is representative of the overall nature of its respective land use type.

3. Parameters to be monitored
   The parameters to be monitored for each discharge point shall include:
   - pH (SU)
   - Hardness (mg/l)
   - Conductivity (umos)
   - Oil and grease (mg/l)
   - Chemical Oxygen Demand (mg/l)
   - Turbidity (NTU)
   - Total Suspended Solids (mg/l)
   - Total Phosphorous (mg/l)
   - Ammonia (mg/l)
   - Total Kjeldahl Nitrogen (mg/l)
   - Nitrate plus Nitrile Nitrogen (mg/l)
   - E. coli (col/100ml)

4. Stormwater Monitoring Procedures
   (A) Wet Weather Outfall Monitoring:

   Samples shall be collected from discharges resulting from any rain storm that produces a discharge from the outfall(s) being monitored and that occurs at least 48 hours after any previous rain storm that
produced a discharge from the outfall. Runoff events resulting from snow or ice melt alone cannot be used to meet these monitoring requirements. Monitoring may be conducted during a rain event that may include insignificant amounts of snow or ice melt. Monitoring shall consist of a single grab sample taken within the first six (6) hours of discharge from the outfall.

(B) Rain Event Information

The following information shall be collected for the rain events during which monitoring is conducted:

(i) The date, temperature, time of the start of the discharge, time of sampling, and magnitude (in inches) of the rain event sampled.

(ii) The duration between the rain event sampled and the end of the previous measurable (greater than 0.1 inch rainfall) rain event.

(C) Test Procedures

Unless otherwise specified in this permit, all pollutant parameters shall be tested according to the methods prescribed in the Title 40, CFR, Part 136 (1990). Laboratory analyses must be consistent with Connecticut Reasonable Confidence Protocols.

5. List of Municipal Stormwater Monitoring Discharge Locations

A list of Municipal Stormwater Monitoring Discharge Locations shall be supplied to the contractor by each participating municipality once an award is made. Prior to the first sampling event, the technician who will be performing the sampling, will visit each stormwater sampling site with a representative of the municipality who will show the technician the sample locations and the right-of-ways used to access each.

6. Experience

Each respondent is required to submit satisfactory evidence as part of the bid proposal demonstrating his or her experience monitoring municipal stormwater. Accordingly, a list of at least four (4) municipalities where this type of work has been performed during the past two (2) years shall be furnished, including contact persons and phone numbers. (See the attached Information Sheet.)

7. Basis for Payment/Invoicing

The contractor shall submit completed Municipal Stormwater Monitoring Report Forms for each one of the six (6) stormwater outfalls (as well as for any additional outfalls) to the town’s designated representative. The contractor shall attach the specific laboratory report to each one of the Forms. These materials, in conjunction with an invoice, shall be used as the basis for issuing payments.

8. Pricing Structure

Bidders shall submit a bid on a per discharge location basis to be applied to all participating municipalities within a given watershed area. The five watershed areas are highlighted on the CT DEP’s Watershed Management Program Map contained herein. It shall be understood that this unit price will apply to all types of discharge locations (e.g. industrial, commercial and residential) within the specified watershed area.

All prices submitted shall apply throughout the term of the contract, and shall be deemed all-inclusive (i.e. including travel/mileage costs, etc.). The Capitol Region Purchasing Council strictly prohibits the unilateral imposition of additional surcharges on the participating communities at any point during the contract period.
9. **Inclusion of Non-Participating Towns**
It will be expected that contractors will allow any municipality that is a member of the Capitol Region Purchasing Council to participate under the terms of this bid even if such towns are not listed among the participants on page one.

10. **Terms of Contracts**
Contracts resulting from this Bid Invitation shall apply to work done from January 1, 2018 to December 31, 2019.

11. **Future Bid Invitations**
