

CRCOG Mitigation Action Jeopardy - Answer Sheet

Category (Action Type)	Points	Action Description	Jurisdiction
Education and Awareness	10	Make available literature on natural disasters and preparedness at Coventry Town Hall and at the Booth & Dimock Memorial Library.	Coventry
Education and Awareness	20	Work with property owners to mitigate flood damages when grant funding is available. 60-80 buildings are considered floodprone along Willow Brook as well as in other parts of the city. The City will work with property owners to perform localized or neighborhood mitigation actions upon property owner request when grant funding is available. Mitigation could include acquisition/demolition, elevation, floodproofing, or other techniques.	New Britain
Education and Awareness	30	Notify Wilbur Smith, who is conducting the New Haven-Springfield commuter rail study, of town's flooding and rail safety concerns, and of NRCS study's recommendations.	Newington
Education and Awareness	40	Continue to monitor and work with property owners of five homes on Thornbush Road for possibilities to eliminate risk, including potential use of FEMA grants (these homes are in the flood zone and at times become inundated during high water events).	Mansfield
Education and Awareness	50	Work with local hotels to ensure adequate emergency generating equipment to reduce reliance on municipal emergency shelters.	Windsor
Natural Resource Protection	10	Promote timber management planning with other major landholders including McLean Game Refuge, Land Trust, and the State.	Granby
Natural Resource Protection	20	Protect the integrity of "Great Swamp" and other wetlands from development pressure	Ellington
Natural Resource Protection	30	Monitor and manage Notch Pond Dam beaver population.	Bolton
Natural Resource Protection	40	Develop and implement timber management plan for town-owned forested land	Hebron
Natural Resource Protection	50	Work with property owners, contractors and the DEEP to regularly remove beaver dams causing flooding problems	East Windsor
Preparedness	10	Continue to work with and improve coordination with utility companies to provide first order power restoration to Century Hills, senior housing, age restricted developments and assisted living developments.	Rocky Hill
Preparedness	20	Continue with current practices of relocating personnel to the east side of the Farmington River as needed.	Avon
Preparedness	30	Identify location for secondary access to Island Woods Subdivision and prepare and file map of proposed street in the office of the town clerk in accordance with CT General Statute Section 8-29.	Columbia

CRCOG Mitigation Action Jeopardy - Answer Sheet

Category (Action Type)	Points	Action Description	Jurisdiction
Preparedness	40	Require group homes to have an emergency generator to provide power for essential home utilities, i.e. heat, refrigerator, lighting, etc. during power outages, thus enabling the residents to “shelter in place.”	<b>Enfield</b>
Preparedness	50	Continue installation of dry hydrants and cisterns in needed areas of Town.	<b>Somers</b>
Prevention	10	Develop a watershed compact with other Pequabuck River communities. Town staff wish to develop low-impact design standards that will be adopted by each community in the watershed and enforced by inter-municipal agreement.	<b>Plainville</b>
Prevention	20	Analyze and make recommendations to improve natural and artificial drainage in Industrial Park and Gages Brook.	<b>Tolland</b>
Prevention	30	Assess and make recommendations on public and private structures including, but not limited to, Avery Heights dam, dam at Lake St., dam at Veteran's Park off Parkview Dr., and Dzen's dam.	<b>South Windsor</b>
Prevention	40	Develop a list of private properties for acquisition as they become available at Dowd's Corner.	<b>Canton</b>
Prevention	50	Further study and pursue protection measures for Town Library.	<b>Bloomfield</b>
Structural Projects	10	Relocate Physical Services Complex to higher ground. The Physical Services Complex is located in the floodplain and is at risk of flooding which can render it inoperable during flood events. A grant is necessary to relocate the facility.	<b>Berlin</b>
Structural Projects	20	Implement needed improvements to build a new Emergency Operations Center, when funding is available, at the Department of Public Works facility to withstand hurricanes and other disasters.	<b>Manchester</b>
Structural Projects	30	Upgrade culverts associated with Stratton Brook on Town Forest and Stratton Brook Roads.	<b>Simsbury</b>
Structural Projects	40	Continue to implement necessary repairs and upgrades required by FEMA and the Army Corps of Engineers to retain accreditation.	<b>East Hartford</b>
Structural Projects	50	Review feasibility of micro-grid system(s) within the Town Center area to supplement Town Facilities as well as specific business community operations such as gas stations and grocery stores. This system could be utilized in the event of an extended power outage.	<b>Glastonbury</b>
