

ProMelt™

ULTRA

ProMelt Ultra 2000 inhibited is a high performance deicing liquid made from refined corn carbohydrate derivative blended with magnesium chloride. Best used for stock pile treatments, ProMelt Ultra 2000 delivers unparalleled performance in colder temperatures.

Features and Benefits:

ProMelt Ultra 2000 inhibited de-icer significantly improves the eutectic point and phase change properties of $MgCl_2$. ProMelt Ultra 2000 inhibited has the extremely low eutectic point of approximately $-85^{\circ}F$.

- Salt pretreated with ProMelt Ultra 2000 inhibited works at lower temperatures than traditional dry salt.
- Reduces bounce and scatter thereby reducing salt application rates which saves time, labor, fuel and materials.
- Meets the stringent requirements of the PNS (Pacific Northwest Snowfighters) for corrosion, toxicity and performance.
- Strong residual effect provides lasting performance.
- Better for the environment – our magnesium chloride is approved for organic production as a crop fertilizer and soil amendment by OMRI in the US and Canada.
