

# GLENZOIL 20 PLUS

## **Crack Sealant Barrier Material**

This crack sealant barrier material is a unique biodegradable liquid that prevents tracking and picking of freshly applied hot-melt sealants. Formulated for direct application to the surface of freshly applied hot-melt crack and joint sealant. Forms a protective barrier between the crack sealant and the vehicle tires allowing traffic immediate access to the roadway without picking or tracking of the sealant. Requires one person to apply, saving labor costs and eliminates the mess associated with conventional blotting materials. DOES NOT affect the performance or composition of crack sealant or road surface.

### **Directions for Use**

Spray GLENZOIL 20 PLUS directly onto the surface of freshly applied hot-melt crack sealant using a hand held pump up sprayer. There is no specific time interval required between the application of the sealant and the product. Rate of application will vary depending upon ambient and surface temperatures, depth, width and frequency of cracks, traffic volume, and the distance of shadow vehicles.

Estimated average rate of application is 1 gallon of GLENZOIL 20 PLUS to every 1000 to 2000 feet of sealed cracks.
