## Striving To Be the Best in Occupational Health

Connecticut Occupational Medicine Partners, LLC (COMP) was established in 2000 and since then has grown to seven occupational health affiliated clinics– helping over 15,000 employers throughout the state of Connecticut.

COMP is the premier occupational health & medicine clinic network in the state. We specialize in and are dedicated solely to the treatment of work-related injuries and illnesses. Our goal is to return employees back to functional work and their private lives through specific treatment plans as soon as possible. Our referral network includes orthopedic surgeons, neurosurgeons, and other specialists to insure timely referrals. On site physical therapy, X-ray and lab services are available at most locations.

## Who We Serve

We work collaboratively with employers, insurance carriers, municipalities and TPA's, providing a host of pre-employment and post-injury management services. Together we identify and facilitate return to work timely and safely, promoting modified- duty opportunities.

## Our Strengths

We are a multi-functional network specializing in Occupational Medicine. Our affiliated clinics provide:

- Pre-employment physicals
- DOT Examinations
- Urine drug screening
- Audiograms
- Spirometry
- Breath alcohol testing
- Functional Capacity Exams
- Work Fitness Assessments
- Work Related Injury Care
- Respirator Exams & Fit testing
- Police Steroid Testing
- Police Mental Health Evaluations
- Vaccinations

With a strong foundation in prevention, health, and safety for employees, COMP has partnered with business and industry in order to provide comprehensive and specialized care.

## Why Use COMP?

Through affiliation with seven clinics, we serve a large segment of Connecticut and Massachusetts. Our physicians are board certified in Occupational Medicine or Emergency Medicine, which allows us to deliver superior service, accelerated return to work and cost-effective outcomes.

Using Evidence-Based Medicine Guidelines creates enhanced outcomes for injured workers, employers and workers' compensation payers when the guidelines are followed.

Some of our clinics have on-site physical therapy available, thus making it easier for the physical therapist and physician to communicate about the injured worker's status.

## We Can Help You Achieve:

- Reduced workers' comp costs
- Reduced injury related lost work days
- Improved workplace compliance
- Reduced workplace injuries
- Increased employee productivity
- Timely appointments, communication and return to work
