

CRPC #751 · INVITATION TO BID Asphalt Pavement Crack Sealing Addendum 1

Opportunity Q&A Answers

Q1. I filled out the Company Information. After I filled it out, it did not register 100% at the bottom like it did last year. Then I tried to attach it to the spot in the submission portal and I got an error message, "! Company_Questionnaire_template_UPDATED_(2).xlsx Error: error - The uploaded file does not match the template required for this Questionnaire. Please use the proper template and try again." Could something be wrong with the spreadsheet?

A1. The template is correct and appears to be properly downloaded. If there is an issue with the submission, we will reach out to bidders for a copy of the questionnaire.

Q2. I would like to submit the following bid questions regarding the bid page "751 APCS (BT-36EQ). 1. Regarding Item #2-2 Emulsified Asphalt /Fog Coat Sealer - Hot Poured Method - Per Pound. Fog seal is usually bid by the Square Yard. Can this item be updated along with the corresponding quantity to be bid by the SY? 2. Regarding Item #3-1 Stone Mastic Asphalt - Hot Pour Method - Per Linear Foot. Mastic is typically bid by the gallon or pound as it is used on several areas other than cracks. Can this item be updated along with the corresponding quantity to be bid by the gallon or pound. Thank you for taking the time to review and answer these questions.

A2. Going forward we can update the bid table if it is best suitable for our members. However, we cannot change the format for this bid as member towns have already submitted and requested quantities as is.
